

MICROSOFT

At Microsoft, we're motivated and inspired every day by how our customers use our software to find creative solutions to business problems, develop breakthrough ideas, and stay connected to what's most important to them.

We run our business in much the same way, and believe our three core business divisions offer the greatest potential to serve our customers. They are:

- **Platform Products and Services Division:** Includes the Client Group, the Server & Tools Group, and the Online Services Group
- **Business Division:** Includes the Information Worker Group, the Microsoft Business Solutions Group, and the Unified Communications Group
- **Entertainment and Devices Division:** Includes the Home & Entertainment Group and the Mobile & Embedded Devices Group

We are committed long term to the mission of helping our customers realize their full potential. Just as we constantly update and improve our products, we want to continually evolve our company to be in the best position to accelerate new technologies as they emerge and to better serve our customers.

Microsoft Certifications

Enhance your professional IT career with Microsoft certification. Let's face it, Microsoft is a giant in the industry and no IT professional should be without Microsoft skills. Whether you work with these products on a daily basis or on a case-by-case basis, having the appropriate skills and certifications will come in handy and serve you well. In addition, you'll become more valuable to organizations with the appropriate credentials.

If you're just starting out, there are numerous entry level certifications you can pursue that will immediately give you validation of your skills and prepare you for the next, more advanced level. Don't just sign up for the exam though, prepare yourself with Microsoft Certification Training.

When you choose CBT Planet for your Microsoft certification training, you are choosing a leader in the learning industry who backs up our products with our guarantee. You'll be able to choose from a wide variety of delivery methods for the Microsoft training of your choice. We offer convenient products such as CBT – Computer Based Training, Online Live Training, and Full-motion Computer Training Videos. If you prefer a live instructor, we have Classroom Training, Dedicated Onsite Training and even Accelerated Learning such as Boot Camps.

MCSE Certification

Microsoft Certified Systems Engineer (MCSE) certification is designed to give workers the skills and training they need to design and implement infrastructure solutions that are based around the desktop and server operating systems developed by Microsoft.

- **MCSE Certification**
- **MCSE Messaging**
- **MCSE Security**

MCSA Certification

Microsoft Certified Systems Administrator (MCSA) certification is designed to give workers the skills and knowledge they need to administer system environments which are based around the desktop and server operating systems developed by Microsoft Corporation

MCDST Certification

Microsoft Certified Desktop Support Technician (MCDST) certification path is designed to provide students with the knowledge, skills and training they will need to troubleshoot common hardware and software issues encountered in the business and educational environment.

MCAD Certification

Microsoft Certified Application Developer (MCAD) certification is designed to provide learners with the skills, training and knowledge they will need in order to develop and maintain applications, Web clients, desktop clients, components and back-end data services.
