

## Acronym/Nickname

**Certification Body**  
COMPTIA

## Description

CompTIA Convergence+ validates the knowledge and skills in the area of Communications Technologies (CT), where datacomm, telephony/telecommunications, video and broadcast multimedia technologies combine into a single IP-based delivery system. It is an international, vendor-neutral certification that recognizes a technician's ability to design, implement and manage both data and voice networking. Although not a prerequisite, it is recommended that CompTIA Convergence+ candidates are CompTIA Network+ certified and have 18 to 24 months of work experience in areas that include data networking, VoIP, and other convergence related technologies.

The demand for skilled technology professionals continues to grow, as more businesses adopt IP Telephony Solutions. CompTIA Convergence+ is a valuable credential to enhance a career with convergence technology. Corporations such as Avaya recognize CompTIA Convergence+ as part of their certification tracks.
