

Acronym/Nickname

Certification Body
COMPTIA

Description

CompTIA Network+ validates the knowledge and skills of networking professionals. It is an international, vendor-neutral certification that recognizes a technician's ability to describe the features and functions of networking components and to install, configure and troubleshoot basic networking hardware, protocols and services. Although not a prerequisite, it is recommended that CompTIA Network+ candidates have at least nine months of experience in network support or administration or adequate academic training, along with a CompTIA A+ certification.

Certification Level

Covered competencies

Earning a CompTIA RFID+ certification validates an RFID technician's knowledge and skills in the areas of installation, maintenance, repair, and upkeep of hardware and software functionality of RFID products.
