

Acronym/Nickname

Certification Body
COMPTIA

Description

CompTIA Project+ is a globally recognized project management certification that provides validation of fundamental project management skills. It covers the entire project life cycle from initiation and planning through execution, acceptance, support and closure. Unlike some project management certifications, CompTIA Project+ can be acquired in a quick and cost-effective manner. There are no prerequisites, and candidates are not required to submit an application or complete additional hours of continuing education.

CompTIA Project+ gives project managers the skills necessary to complete projects on time and within budget, and creates a common project management language among project team members.

Certification Level

Covered competencies

- **Proof of professional achievement, leading to better job opportunities.**
 - Fifty-one percent of CompTIA Project+ certified professionals report a significant career impact since certification. Responses include pay raise, increased respect and improved quality of work.*
- **Confidence in your ability to effectively manage projects.**
 - Eighty-four percent of certified professionals feel that they have the required skills to do a superior job.**
- **Validation of achievement in an industry-valued skill.**
 - Forty-four percent of individuals with the CompTIA Project+ credential say they certified for knowledge and credibility.*
