

IBM Certified Specialist - High End Disk Solutions Version 5

| | | | |
|--|-------------------------------------|---|--|
| Acronym/Nickname | | Certification Body IBM | |
| Description The IBM Certified Specialist - High-End Disk Solutions, Version 5 performs requirements analysis, architecture development/solution design, planning/installing, and post-installation support for enterprise disk solutions. This specialist takes a consultative approach to support sales, and he or she trains customers and peers in enterprise disk storage technical issues. | | Certification Level Specialist | |
| | | Covered competencies The success candidate must have: <ul style="list-style-type: none"> • Two to three years experience in disk operations with multiple server platforms • Implement a high-end disk storage solution in a mainframe or open systems environment • Three to five years experience in a related Information Technology technical support role • Capability to work independently and effectively in complex environments | |
| | | Requirements Candidates must pass the ff exams: | |
| | | <ol style="list-style-type: none"> 1. Test 746 - High End Disk Solutions Version 5 | |
| Target Technical Designer | | Career Path | |
| Authorized Testing Center: Prometric | Indicative Fee* 95.00 USD | Certification Schedule** | |
| <p>* Fees are exclusive of VAT and wire transfer fee ** Fees and schedules are subject to change without prior notice, please get in touch with Authorized Testing Centers through contact details below</p> | | | |
| Recommended/Preparatory Training | | | |
| Course title: Planning and Implementing the IBM TotalStorage DS8000 for zSeries Course duration: 2.0 days Course number: SS590 Abstract: Discuss installation and maintenance of the IBM TotalStorage DS8000 in a zSeries environment. Learn about the high level design of the IBM TotalStorage DS8000 series and identify the installation and customization tasks that are necessary to install and exploit the technology. Explore the components of the IBM TotalStorage DS8000, including the 2107 server, the Storage Management Console (SMC), IBM TotalStorage DS8000 Storage Manager (DS Storage Manager) software, and the terminology of the IBM TotalStorage DS8000 including, Disk Drive Modules (DDMs), array site, array, rank, extent pool, and logical volume. Learn how to install, cable, and configure the DS8000 system using the IBM TotalStorage DS Storage Manager Graphical User Interface (GUI) and the IBM TotalStorage DS Command-Line Interface (DS CLI). Complete labs on the DS Storage Manager using the offline simulator mode of the DS Storage Manager | | | |
