

IBM Certified Specialist - TotalStorage® Networking and Virtualization Architecture, Version 2

Acronym/Nickname		Certification Body IBM	
Description The IBM Certified Specialist - TotalStorage® Networking and Virtualization Architecture, Version 2 designs IBM TotalStorage end-to-end storage networking solutions to meet customer needs. This individual provides comprehensive storage networking solutions that include servers, storage virtualization, storage networking, storage devices, management software, and services. This specialist has detailed knowledge of storage virtualization, storage networking technologies and the corresponding management software. He or she has broad knowledge of IBM storage products and their features and functions. This individual can describe in detail storage networking and virtualization strategies and solutions, the industry, competition, and business trends and directions.		Certification Level	
		Covered competencies The success candidate must have: <ul style="list-style-type: none"> • Hands-on experience in storage networking and virtualization (e.g., lab or customer environment) • Experience with a broad range of storage products, including disk, tape, and storage software • Experience across a range of server platforms • Three to five years experience in a related Information Technology technical support role • Capability to work independently and effectively in complex environments 	
		Requirements Candidates must pass the ff exams:	
		<ol style="list-style-type: none"> 1. <i>Test 389: IBM TotalStorage Networking and Virtualization Architecture, Version 2</i> 	
Target Technical Specialist		Career Path	
Authorized Testing Center: Prometric	Indicative Fee* 95.00 USD	Certification Schedule**	
<p>* Fees are exclusive of VAT and wire transfer fee ** Fees and schedules are subject to change without prior notice, please get in touch with Authorized Testing Centers through contact details below</p>			
Recommended/Preparatory Training			
Course title: Introduction to Storage Networking Course number: SN700 (USA) Course duration: 2 days Course abstract: Examine products and strategies associated with managing the explosive growth of business data across the enterprise in today's networking economy. Learn the basic concepts and terminology associated with Storage Area Networks (SAN), Network Attached Storage (NAS), Internet Small Computer System Interface (iSCSI), and map the promise of SANs to the complications of managing islands of information among heterogeneous environments with disparate operating systems, data formats, user interfaces, and limited integration of products from assorted vendors. Learn how to enable your enterprise to take advantage of storage networking.
