Recommended/Preparatory Training

Course title: UniVerse Fundamentals

Course number: L1-UV-900

Course duration: 4 Days

Course abstract: This course introduces the UniVerse relational database environment. Learn about the tools and commands used to input data into storage files, modify data records, and extract the records to produce and print reports. Build a sample database application including data input through the UniVerse REVISE processor and reporting using the RETRIEVE processor. Create menus of stored reports and commands. This course also covers UniVerse commands that perform ad hoc queries, generate and print reports, and create stored procedures to gather business information. The UniVerse RETRIEVE syntax is shown, as well as some ANSI standard SQL query usage.
