

IBM Certified Associate System Administrator - Lotus Notes and Domino 7

Acronym/Nickname

Certification Body

IBM

Description

Lotus highly recommends using a variety of resources to prepare for certification exams. In all cases, you must start with the exam guide to determine which tasks will be covered on the exams. Equally as important, actual hands-on experience is required. From there, we recommend that you choose from the following preparation options.

During your preparation, it is important that you review the exam guide periodically to make sure that all of the material in the exam guide is covered in your choice of preparation methods. It should be noted that there is not a one-to-one correspondence between these preparation methods and the exam.

Certification Level

Covered competencies

- How to install and configure a Domino network from the ground up
- The ins and outs of using the Domino Administrator client
- How Domino security works, from user IDs to server access to database ACLs
- Configure mail routing between Domino servers and between a network and the Internet
- Setup replication between Domino servers and find out how to control what replicates
- The tricks to troubleshoot mail routing and replication
- Securely enable a Domino server to act as a web server
