Recommended/Preparatory Training

Course title: Information Analyzer Essentials

Course duration: 4.0 Days

Course number: DX711

Abstract: Learn about Information Analyzer in its IBM Information Server environment. Students will learn how to use Information Analyzer to profile a complex set of data. Students will gain hands-on experience by performing several data profiling tasks - column, table, and cross-domain analysis. These tasks will reveal data interrelationships as well as anomalies and error conditions. This is a basic course for Data Analysts responsible for data investigation using Information Analyzer.
