

# IBM Certified Advanced Deployment Professional - Tivoli Storage Management Solutions 2006

## Acronym/Nickname

**Certification Body**  
IBM

## Description

An IBM Certified Advanced Deployment Professional - Tivoli Storage Management **Solutions 2006** is an individual who has demonstrated a higher level of implementation knowledge and skill both in breadth and in depth in the IBM Tivoli Storage Management solutions area.

**Certification Level** Professional

## Covered competencies

Successful Candidates must have

Demonstrated a higher level of implementation knowledge and skill both in breadth and in depth in the IBM Tivoli Storage Management solutions area.

## Requirements

Candidates must pass *three required tests*.

1. Test 799: IBM Tivoli Storage Manager V5.3 Implementation
2. Test S10-100: SNIA Storage Network Foundations Exam (formerly Test IO0-100)
3. Test 252: WebSphere Application Server V6.0, Basic Administration

## Target

IBM Certified Advanced Deployment Professional

## Career Path

## Authorized Testing Center:

Prometric

## Indicative Fee\*

150.00 USD

## Certification Schedule\*\*

\* Fees are exclusive of VAT and wire transfer fee

\*\* Fees and schedules are subject to change without prior notice, please get in touch with Authorized Testing Centers through contact details below

## Recommended/Preparatory Training

Course title: IBM Tivoli Storage Manager V5.3 Implementation

Course duration: 5 days

Course number: TSM for Windows -> TS573 (US); TS57G (WW) TSM for AIX -> TSX73 (US); TS57G (WW)

Geo education page: Worldwide schedules available at Tivoli software education.

IBM PartnerWorld "You Pass We Pay": This course is approved for IBM PartnerWorld You-Pass, We-Pay.

Abstract: This 5-day instructor-led course provides hands-on practice in implementing a data management strategy with IBM Tivoli Storage Manager 5.2. The course begins with installing the IBM Tivoli Storage Manager 5.2 Server, backup/archive clients, and administrative clients. Once the basic installation is complete, students gain practice with using the commands needed to install and configure a tape library locally attached to an ITSM server and to prepare media for use in a device library. After devices are configured, students create simple storage pools and subsequently learn to configure hierarchies of storage pools to manage the flow of data from disk to tape media. Next, storage pools are mapped to the data sent by client nodes through IBM Tivoli Storage Manager policies that provide the rules to implement data management service level agreements. Students define new policy domains, policy sets, management classes, backup copy groups, and archive copy groups. To authorize administrators to perform specific storage tasks, students register administrators and grant the privileges required to support specified responsibilities. Students backup and restore client data, as well as manage long-term and offsite data management through archiving and retrieving of client data. After learning to backup/restore and archive/retrieve data, students practice automating client operations by creating new IBM Tivoli Storage Manager schedules. To monitor client operations, students subsequently learn to configure and manage storage events. Finally, students will learn how to protect their IBM Tivoli Storage Manager server by automating the backup and restore of the IBM Tivoli Storage manager databases and storage pools from offsite data storage pools.
