

Acronym/Nickname

MCAD

Certification Body

Microsoft

Certification Level

Covered competencies

The MCAD for Microsoft .NET credential is appropriate for professionals who use Microsoft technologies to develop and maintain department-level applications, components, Web or desktop clients, or back-end data services or work in teams developing enterprise applications. Candidates are expected to have one to two years of relevant work experience or the equivalent in these functions.

Description

The MCAD credential was created in response to industry demand for a certification that allows developers to show they have the skills necessary to successfully implement functional specifications and build, deploy, and maintain Microsoft Windows and Web applications.

Requirements

MCAD candidates must pass:

- a. Two (2) core exams listed below:
 1. One Web or Windows Application Development exam (70-305, 70-306, 70-315, 70-316)
 2. One Web Services and Server Components Development exam (70-310, 70-320)
- b. And one Elective exam, either exams nos. 70-229, 70-230, 70-234, or 70-235.

Target

Career Path

- Programmer
- Programmer/Analyst
- Software Developer
