

# Microsoft Certified Architect: Infrastructure Program

## Acronym/Nickname

## Certification Body

Microsoft

## Description

The Microsoft Certified Architect (MCA) program identifies top industry experts in the fields of IT architecture. Unlike other industry certifications, this credential is designed, built, and granted by industry peers, and candidates are required to present to and be approved through a rigorous review board process overseen by previously certified architects.

## Certification Level

### Covered competencies

The MCA certification for infrastructure architects was designed for IT architects whose key areas of focus include physical network, security, storage, network operating systems, application platforms, desktop operating systems, messaging, management, or operations.

Successful candidates for the infrastructure architecture certification generally have more than 10 years of experience in IT, and three or more years of specific architectural experience.

### Requirements

MCA candidates must:

1. Attend and successfully complete the training.
2. Successfully complete weekly written tests.
3. Successfully complete the lab-based exam.
4. Successfully complete the certification Review Board interview.

## Target

## Career Path

## Authorized Testing Center:

## Indicative Fee\*

## Certification Schedule\*\*

\* Fees are exclusive of VAT and wire transfer fee
