

Microsoft Certified Systems Administrator Messaging on Microsoft Windows 2000

| | | | |
|---|------------------------|--|--|
| Acronym/Nickname | | Certification Body Microsoft | |
| Description | | Certification Level | |
| <p>The Microsoft Certified Systems Administrator (MCSA) Messaging certification allows systems administrators to demonstrate deep, role-based skills around implementing, managing, and maintaining a Microsoft Exchange messaging infrastructure on the Microsoft Windows operating system.</p> | | <p>Covered competencies The MCSA Messaging certification is for IT professionals in a systems administrator job role who specialize in implementing, managing, and maintaining a Microsoft Exchange infrastructure on the Windows platform. An MCSA Messaging candidate should have at least 12 months of experience implementing and administering desktop and network operating systems, and managing the network infrastructure in the typically complex computing environment of medium-to-large organizations. The candidate should also have 12 months of experience administering Exchange Server environments involving multiple physical locations, mixed connection protocols, and Internet messaging.</p> <p>Requirements MCSA candidates must pass three core exams listed below and one Messaging Specialization exam:</p> <ol style="list-style-type: none"> Two Networking System exams One Client Operating System | |
