

Microsoft Certified Systems Administrator Messaging on Windows Server 2003

Acronym/Nickname

MCSA

Certification Body

Microsoft

Description

The Microsoft Certified Systems Administrator (MCSA) certification will advance your career by ensuring that you have the skills to successfully manage and troubleshoot system environments running on the Microsoft Windows operating system.

Certification Level

Covered competencies

The MCSA credential is for professionals who implement, manage, and troubleshoot existing network and system environments that are based on the Microsoft Windows Server 2003 operating system. These individuals typically have design skills. The MCSA: Messaging certification will allow IT professionals to demonstrate messaging-specific skills that are appropriate to the systems administrator job role, which includes implementing, managing, and maintaining a Microsoft Exchange organization.

Requirements

MCSA candidates must pass three core exams listed below:

1. Managing and Maintaining a MS Windows Server 2003 Environment (70-290)
2. Implementing, Managing, and Maintaining a MS Windows Server 2003 Network Infrastructure (70-291)
3. Client operating system exam (70-620, 70-270, or 70-210)

And one Messaging Specialization exam
