

## Microsoft Certified Systems Administrator Security on MS Windows Server 2003

### Acronym/Nickname

### Certification Body

Microsoft

### Description

The Microsoft Certified Systems Administrator (MCSA) certification will advance your career by ensuring that you have the skills to successfully manage and troubleshoot system environments running on the Microsoft Windows operating system.

### Certification Level

#### Covered competencies

The MCSA: Security certification will allow IT professionals to demonstrate security-specific skills that are appropriate to the systems administrator job role, which includes implementing, managing, and maintaining security on Windows Server 2003. Additionally, this certification will allow individuals to show proficiency with Microsoft Internet Security and Acceleration (ISA) Server 2000, Enterprise Edition, or demonstrate security skills beyond the Microsoft platform by achieving CompTIA Security+ certification.

#### Requirements

MCSA candidates must pass three core exams listed below and two Security Specialization exams:

1. Managing and Maintaining a MS Windows Server 2003 Environment (70-290)
2. Implementing, Managing, and Maintaining a MS Windows Server 2003 Network Infrastructure (70-291)
3. Installing, Configuring, and Administering MS Windows XP Professional (70-210)

### Target

Systems Administrator
