

Microsoft Certified Systems Engineer Messaging on MS Windows 2000

Acronym/Nickname

Certification Body

Microsoft

Description

The MCSE Messaging credential will allow systems engineers to demonstrate deep, role-based skills around designing, planning, and implementing a Microsoft Exchange messaging infrastructure on the Windows operating system.

Certification Level

Covered competencies

An MCSE: Messaging candidate should have at least two years of experience implementing and administering desktop and server operating systems, and designing a network infrastructure in the typically complex computing environment of medium-to-large organizations. The candidate should also have at least one year of experience administering Exchange Server environments that involve multiple physical locations, mixed connection protocols, and Internet messaging.

Requirements

MCSE candidates must pass five core exams listed below:

1. Three networking system (70-215 to 217) exams
2. One client operating system (70-210, 70-270, 70-620) exam
3. One design exam

And two core messaging specialization (70-224, 70-225, 70-284, or 70-285) exams:

Target

Systems Engineer
